Name:

APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY FIRST SEMESTER B.TECH DEGREE EXAMINATION, DECEMBER 2018

Course Code: EC100

Course Name: BASICS OF ELECTRONICS ENGINEERING

Max. Marks: 100

Duration: 3 Hours

Pages: 2

| | PART A | |
|---|--|-------|
| | Answer all questions, each carries 5 marks. | Marks |
| 1 | Explain the different types of variable resistors? Mention their applications. | (5) |
| 2 | What is meant by intrinsic and extrinsic semiconductors? How a P-type | (5) |
| | semiconductor is formed? | |
| 3 | Explain the working of Zener voltage regulator with a neat diagram. | (5) |
| 4 | Draw the functional block diagram of an operational amplifier. List the | (5) |
| | parameters of an ideal Op-amp | |
| 5 | Write the expression of an AM and FM signal and explain the terms. | (5) |
| 6 | Explain how modulation reduces antenna height. | (5) |
| 7 | Discuss the major advantages of optical communication system. What are the | (5) |
| | sources and detectors used in optical fibre communication system? | |
| 8 | What is meant by a DTH system? What are the main features of DTH? | (5) |

PART B

Answer six questions, one full question from each module and carries 10 marks.

Module 1

| 9 | a) | Write down the color code for a given resistor of 47-Kilo-ohms with a tolerance | (4) | | | |
|----|-----------|--|-----|--|--|--|
| | | of 10%. | | | | |
| | b) | Discuss on different types of transformers. | | | | |
| | | OR | | | | |
| 10 | a) | Give brief details of | (5) | | | |
| | | (i) Impact of electronics in industry | | | | |
| | | (ii) Medical electronics | | | | |
| | b) | Draw and explain the construction of a wet electrolytic capacitor. | (5) | | | |
| | Module 1I | | | | | |
| 11 | a) | Sketch the input and output characteristics of common emitter transistor | (5) | | | |
| | | configuration and explain briefly. | | | | |
| | b) | Derive the relation between α and β for a transistor. For an <i>npn</i> transistor, | (5) | | | |

 $\alpha{=}0.995$ and $I_E{=}10m$ A. Find I_B and $I_C?$

F

OR

| 12 | | Explain the working of LED and photodiode. Draw the necessary figures | (10) | | | |
|----|------------|--|------|--|--|--|
| | | wherever applicable | | | | |
| | Module 1II | | | | | |
| 13 | a) | With necessary diagrams, explain the working of a centre-tapped full wave rectifier. | (6) | | | |
| | b) | Compare the ripple factor and efficiency of half-wave, centre-tapped and | (4) | | | |
| | | bridge rectifiers | | | | |
| | | OR | | | | |
| 14 | a) | Write the conditions for sustained oscillations. | (2) | | | |
| | b) | Draw the circuit diagram and explain the working of RC phase shift oscillator. | (8) | | | |
| | | Write the expression for its oscillation frequency. | | | | |
| 15 | | Module 1V Explain the generation of various waveforms in a function generator. | (10) | | | |
| | | OR | | | | |
| 16 | a) | Draw the circuit of a non-inverting amplifier and derive the expression for its voltage gain | (7) | | | |
| | b) | Design a non-inverting amplifier for a voltage gain of 11 | (3) | | | |
| | | Module V | | | | |
| 17 | a) | What are the advantages and applications of satellite communication? | (5) | | | |
| | b) | Explain how the geo-stationary satellite covers full earth? Why are they called | | | | |
| | | so? | | | | |
| | | OR | | | | |
| 18 | | With a neat block diagram, explain the principle and working of superheterodyne receiver. | (10) | | | |
| | Module VI | | | | | |
| 19 | a) | Describe step-index multimode, step-index single mode and graded index | (5) | | | |
| | | multimode fibres. | | | | |
| | b) | Explain cable TV network with its block diagram. | (5) | | | |
| OR | | | | | | |
| 20 | | Draw and explain functional block diagram of cellular communication system. | (10) | | | |
| | | **** | | | | |
