PAGES: 210

A		H192010	GES: 2 TON		
Reg No.:		o.:Name:	84110/9		
		APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY	2019 BUTH		
		Course Code: EC402	A ROLLING		
		Course Name: NANOELECTRONICS			
Ma	ax. N	Marks: 100 Durat	Duration: 3 Hours		
		PART A			
		Answer any two full questions, each carries 15 marks.	Marks		
1	a)	Explain sol-gel process and how you can fabricate a quantum wire using	g the (10)		
		technique.			
	b)	Explain quantum mechanical coherence.	(5)		
2	a)	Starting from Schrodinger equation, show that the density of states in a 2D nano ma	terial (10)		
		is independent of energy.			
	<b>b</b> )	Explain the precipitation of quantum dots.	(5)		

	b)	Explain quantum mechanical coherence.	(5)					
2	a)	Starting from Schrodinger equation, show that the density of states in a 2D nano material	(10)					
		is independent of energy.						
	<b>b</b> )	Explain the precipitation of quantum dots.	(5)					
3	a)	Explain the different types of PVD techniques.	(10)					
	b)	Explain any ten properties of graphene.	(5)					
	PART B Answer any two full questions, each carries 15 marks.							
4	a)	Define the term Photoluminescence. Discuss with neat diagrams PL spectroscopy	(10)					
		in detail.						
	b)	Compare electron and optical microscope.	(5)					
5	a)	Illustrate the working of SEM .Explain the different specimen interactions.	(10)					
	b)	Explain how conductivity is increased in 2D electron gas in AlGaAs-GaAs	(5)					
		structure.						
6	a)	Compare MQW with superlattice structure.	(8)					
	b)	Explain modulation doping and why mobility of carrier increases in modulation	(7)					
		doped structure.						
		PART C						
	Answer any two full questions each carries 20 marks							

## two full questions, each carries 20 marks. An 7 a) Derive Landauer Formula and explain its significance. (9) b) Explain Landau levels and its variation with magnetic field. (6) c) Explain perpendicular transport in quantum structure. (5)

## H192010

## PAGES: 2

8	a)	Explain the Shubnikov-de Hass effect of magnetic fields on the electronic and	(10)
		transport properties of the 2D systems.	
	<b>b</b> )	Explain Resonant Tunnel Effect and the operation of Resonant Tunnel Diodes.	(10)
9	a)	Illustrate the working of a quantum well optical modulator.	(8)
	b)	With the help of a neat schematic diagram explain MODFETs.	(8)
	c)	Explain the concept of hot electrons.	(4)
